

MÉLANGE VITALITÉ

COMPOSITION

-  Nucleotides
-  Mannan oligosaccharides
-  Antioxidants

CONTEXTS OF USE

The use of this feed additive is recommended prior to fish farm operations that may cause stress and increase the risk of disease outbreaks, such as:

- ∴ Development of fungal infections in fish because of decreased immunity
- ∴ External wounds and lesions
- ∴ Transfer of fry to pre-growing tanks
- ∴ Changes in water quality parameters (Dissolved Oxygen, water temperature, pH, NH₃, Nitrite, nitrates, etc.)
- ∴ High suspended solids / Organic matter in water
- ∴ Fish handling (grading, vaccination, artificial reproduction)
- ∴ Fish transport
- ∴ Seasonal phenomena (reproduction, seasonal changes, etc.)
- ∴ Stocking or release of fish into rivers.

RECOMMANDATIONS

- ✓ Vet'eau manufactures and distributes this product to enhance disease management and promote fish welfare. The use of **Mélange Vitalité** does not replace veterinary care. Contact your fish veterinarian in the event of any unusual health episode
- ✓ Store the product protected from moisture and light
- ✓ **DO NOT USE THIS SUPPLEMENT FOR NON-FISH SPECIES.**

PRODUCT PROPERTIES

Mélange Vitalité is a preventive treatment containing flavonoid-derived antioxidants, immunostimulants, nucleotides, and mannan oligosaccharides.

-  Increase mucus secretion and protects skin and gill epithelia (such as during handling, skin infections, gill parasitism)
-  Stimulate epithelial regeneration
-  Stimulate non-specific immunity in fish, from fry to broodstock
-  Counteract oxidative stress.

RECOMMENDATIONS

∴ TO BE USED AS A FEED ADDITIVE MIXED WITH FISH FEED

- ∴ Add 100 g of **Mélange Vitalité** per 100 kg of feed
- ∴ Feed additive should be distributed at 1% of live body weight for a minimum period of 30 days (depending on the case, to be validated with the veterinarian)
- ∴ For pellet-based feed: mix 10 g of **Mélange Vitalité** per 10 kg of feed, then bind onto pellets using fish oil (maximum 20 ml/kg of feed). Cod liver oil is particularly recommended
- ∴ Refrigerate the prepared feed for a several hours before distribution
- ∴ Prepared feed can be stored under refrigeration for up to 48 hours. Do not freeze.
